Interpretation -- Education

- Sponsor an innovative, informational, and educational website; feature chapters and events as well as trail-wide elements.
- Translate trail-related materials (i.e., audio/visual and publications) into Spanish.
- Initiate a partnership program with schools along the trail to develop educational programs, materials, and activities:
 - Develop and coordinate field trips, information packets, speakers, and traveling trunks.
 - Sponsor teacher training workshops on trail history and resources.
- Continue to sponsor and expand the current speakers' bureau.
- Develop a strong geo-cache program to encourage visitation to trail sites.
- Encourage chapters to develop tours with knowledgeable guides to trail sites in their areas; promote tours through presentations to schools and special interest groups.
- Encourage each chapter to designate one person as a contact for education or civic programs.

ATHLETE TRACKING

(www.mylaps.com/index.php/us_eng/Websites/corporate/news)

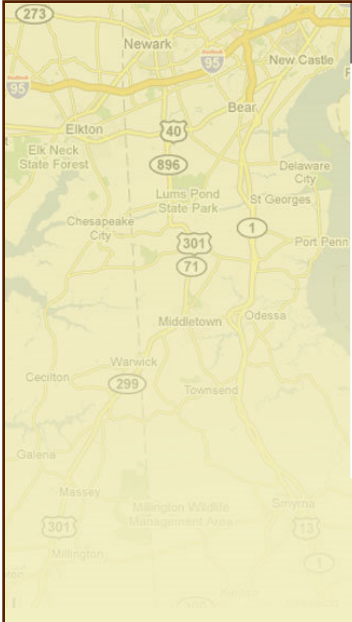

For the first time, Medtronic, Convergent and Atomic Data Centers will provide wireless communications technology for all marathon and ten mile participants, including Global Heroes. Athlete tracking will be provided via text messaging, enabling spectators to track participants along both courses. Click [here](#) to sign up!

Go to the start... Ready? Wuf !

10/09/2010 (www.mylaps.com/index.php/us_eng/Websites/corporate/news)

Although most of our business is in well known sports like car and motor racing, active sports like running, cycling and GPS tracking of events, we do like it when there are events that are different. Today's feature is an event for army and police dogs in the Netherlands.

Timed with ChampionChip, the dogs have to follow a course. And not just the dogs: their human police colleagues accompany them along the same course, even if that means going into the water.

The movie is in Dutch, but the pictures tell all: <http://bit.ly/a89G45>
