Hassle Elimination Learning Process
https://goo.gl/e3SjfE
Guiding spirits somehow appear when you're last expecting them such as following :: This resonates with prior "lessons learned" while enroute to USA's off-shore Vietnam War ::

My takeaway as a #USNavy Veteran is to HONOR all humanity's inner voices thanks to a spirit who shared WIZdom from the Korean War trenches serving wounded Marines ...
==========
Leadership traits result in empowering and inspiring others when the situation is seasoned with "attitude, aptitude and abilities" plus a dash of UNODIR (Unless Otherwise Directed) . . .

I got my *most memorable leadership lesson* from a Master Chief Hospital Corpsman (MCHC) while I was an Ensign in transit via a USAF MAC flight to join USS Cimarron (AO-22) at Subic Bay, PI (in April, 1967)

Over an ice-cold San Miguel beer at off-base quarters near Clarke AFB, this savvy MCHC convinced me RHIP (Rank Has Its Privileges) hampers authentic leadership!

His advice for more effective leadership passed
the O-1/KISS Test.[Keep It Simple Stupid] . . .
1 - Always LISTEN to your senior petty officers.
2 - TRUST your crew to perform their assigned tasks.
3 - Eliminate HASSLES for your crew whenever possible!

My operational experience generated these guidelines:
4 - AVOID recycling prior "lessons learned"
5 - Be PREPARED for unexpected contingencies!
6 - Become a Master Chief Hassle Eliminator (MCHE)

EarthSea-Keeping (@KEarthSea) Mentorship Vision 2005:
What are the critical common connections between sustainable environmental
protection & community-based emergency preparedness efforts for coping with
abnormal situations?

Highly Effective "Leaders don't force people to follow,
they invite them on a journey." ~Charles S. Lauer

i) Single-Failure Points

https://goo.gl/x84Vs5
A single point of failure (SPOF) is a part of a system that, if it fails, will stop the entire system from working. SPOFs are undesirable in any system with a goal of high availability or reliability, be it a business practice, software application, or other industrial system.

(1) Supply Chain Management

https://goo.gl/pLDmQN
Supply chain management (SCM) is the broad range of activities required to plan, control and execute a product's flow, from acquiring raw materials and production through distribution to the final customer, in the most streamlined and cost-effective way possible.

  https://goo.gl/ypYEYd
  Failure-Mode & Effects Analysis
  —also "failure modes", plural, in many publications—was one of the first highly structured, systematic techniques for failure analysis. It was developed by reliability engineers in the late 1950s to study problems that might arise from malfunctions of military systems.

(3) RCCA

https://goo.gl/Mk7UV3
Root-Cause Corrective-Action
Essentially it is based on four general principles, extended throughout this article:
https://en.wikipedia.org/wiki/Root_cause_analysis
Define and describe properly the event or problem ('five whys' technique).
Establish a timeline from normal situation until the final crisis or failure.
Distinguish between root causes and causal factor.
Once implemented (and with constant execution), RCA is transformed into a method of problem prediction.

(b) StoryChasing

https://goo.gl/KrcSK8
A Story Chaser is someone who is determined to go after their dreams even when fear and anxiety consume them.
A Story Chaser will overcome those fears and anxiety with each mile they travel, with each experience they encounter, with each person they meet.

A Story Chaser is creating stories.
Stories of their travels.

Collecting stories from people they meet and sharing their dreams and experiences.

These stories fuel even more stories which are collected in video, blog, and in my mind as I live out my dreams now.
I am a Story Chaser and I am happier than I've ever been in my life!
